

ACCELERATING TECHNOLOGIES TO MARKETS

The experience of SeedLab, leading tech-based startups accelerator in Italy

SeedLab was started in 2012 in collaboration with Italian VC funds to help structure promising tech ideas into viable ventures.

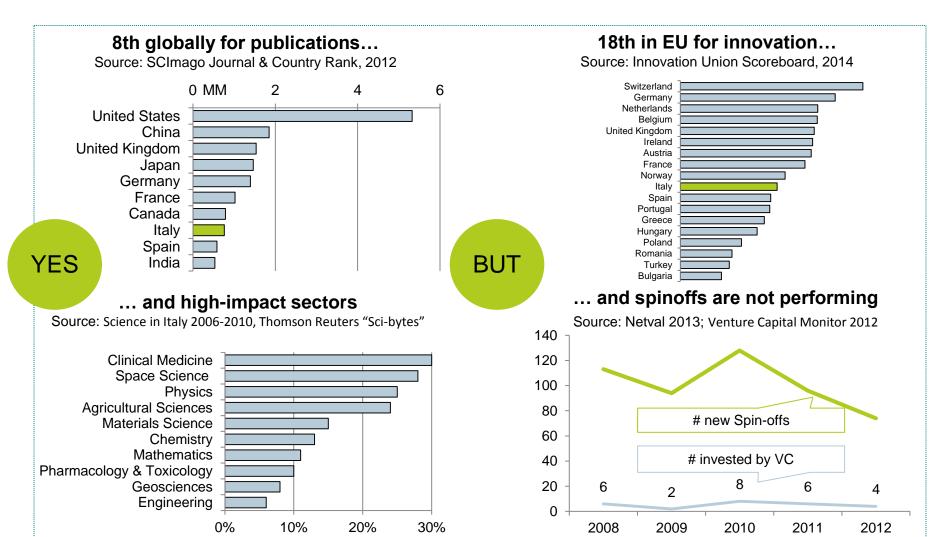

The intensive program is built on mentorship, hands-on advisory and high education.

Two editions of SeedLab have since taken place, for a total of 25 startups accelerated, with positive results: x4 probability of receiving funding and wide visibility in international networks.

Italy, great potential for innovation... with limited results

Some success / failure factors are clear

success in literature...

Probability of entrepreneurial success for increases if the spinoff...

... has a non-academic CEO

... received VC funding

... grew IP beyond initial licensing

... participated to joint-venture

... academic consulted for industry

... failures in practice

Investors don't invest in business proposal because the startup lacks...
